

CARAMUNICH

Stonehelm.co.uk Malt Index

Grown in:

Germany

Description:

A very special and rare malt only produced in Bamberg in northern Bavaria. It is made in a similar way to Munich Malt except that caramelization is allowed to progress further and kilning is conducted at higher temperatures. Although only used in small quantities, it has a marked effect on the fullness of flavour and aroma in golden to brown lager beers and ales.

Max Percentage of Mash:

10%

EBC:

80 - 100

brupaks
